

Introduction to NLP

Ex. of application:

- ↳ Question Answering
- ↳ Information Extraction
- ↳ Sentiment Analysis
- ↳ Machine Translation

Spam detection Mostly solved

Port-of-Speech (POS) Tagging

Named entity recognition (NER)

Sentiment Analysis making good progress

Coreference resolution

Word sense disambiguation

Parsing

Machine Translation (MT)

Information Retrieval (IR)

Question Answering (QA)

Paraphrase

Summarization

Dialog

still really hard

neologisms

segmentation
tones

idioms

Why is NLP difficult? → non-standard language

↳ Ambiguity "crack blossoms"

- President linked to SAL crash blossoms

- Red Taper holds up new bottage

multiple interpretation

words sense

1. relay

2. to support

Ambiguity is pervasive

phrase structure

So, how do tackle and make progress

on this problem? → need help → knowledge about language
→ knowledge about the world

use
probabilistic model (————— generally —————) → A way to combine knowledge
built from data resources
